

TECHNICAL DATA SHEET

Standard Blue Antifreeze

Monoethylene glycol based antifreeze

Product code: N905

Product Description:

Standard Blue Antifreeze is a universal engine coolant, suitable for all year round usage.

Standard Blue Antifreeze is blended using pure monoethylene glycol, anti-corrosion additives and inhibitors. It has been specially formulated to be truly universal in its application. It provides a high degree of corrosion protection for all engine cooling systems whether they are predominantly of aluminium or ferrous construction. Standard Blue Antifreeze employs established inhibitor technology and is nitrite, amine and phosphate (NAP) free and includes borate and silicate.

Standard Blue Antifreeze contains a bittering agent to prevent accidental consumption.

Application:

Standard Blue Antifreeze is suitable for all year round usage in automotive and commercial petrol and diesel engines and certain industrial applications.

Recommended Dilutions:

Antifreeze Blue can be used as supplied, or further diluted in accordance with the table below.

Concentration (by volume)	50%	80%	100%
Freeze Protection (°C)*	- 20	- 38	- 56

*Average of freezing point and pour point.

Product Specification:

Standard Blue Antifreeze meets or exceeds the requirements of the following European & international standards:

ASTM D 3306 & ASTM D 4985

SAE J 1034

BS 6580: 2010
